1. UAT Scope (In Scope – Out of Scope)

UAT - In Scope	UAT - Out of Scope
In Scope <ul style="list-style-type: none">- Implemented features- User Stories- Strategy Plan Feasible Features- Forms Validation- Data Input / Output functionality	Out of Scope <ul style="list-style-type: none">- Future Features

2. UAT Assumptions and Constraints

UAT Assumptions

Assumption

- **All bugs found had been solved**
- **Testing the last version of the product before deployment**

UAT Constraints

Constraint *List the UAT constraints.*

- **Time frames:** 3 days
- **Resources:**
 - o Human resources: 1 tester
 - o Provided hardware: Acer Aspire, Samsung Galaxy Tablet, Android mobile Device
 - o Tested operating systems:
 - Windows 10
 - android
 - o Browser tests:
 - Chrome

3. UAT Risks

Description	Probability High Med Low	Impact High Med Low	Mitigation
Inexperienced Testers	High	High	Created a bug report form in the readme.md file on the bug section. The tester can

Please visit <https://original-crafts.herokuapp.com/>

- Select a product from the popular products displayed on the homepage
- The product details page is displayed
- Below the product details, there is the “add to trolley” button
- Click the add to cart button
- The product is added to the trolley
- A message is displayed to the user
- The cart total is updated
- The product number in the cart is updated
- The delivery message on the top of the page is updated
- Click on the cart icon on the top right of the page
- The cart page is displayed
- The cart details are displayed
- The user can update or delete the products in the cart with the update and delete buttons displayed below the product quantity on the cart page
- The checkout button is displayed
- Click the checkout button
- The checkout page is displayed
- Fill the checkout form with the user details
- For the payment add the credit card number provided by stripe for testing
- Credit card number 4242 4242 4242 4242 4/24 56868
- Click on the “Complete order” button
- If the form is valid the checkout complete page is displayed
- The order and delivery details are displayed
- A message will inform the user the checkout was successful
- A message informs the user that the confirmation email has been sent to the email address provided
- At the bottom of the page, a button will link registered users to their profile page
- At the bottom of the page, a button will link unregistered users back to the homepage

Expected result:

- The user can add a product to the trolley
- The user can proceed to the checkout page
- The user can update, delete products quantity on the checkout page and get confirmation messages after his actions
- The user can securely pay using a credit card
- The user receives a confirmation email that the checkout was successful
- The user to receive an email with the order number
- The registered user can check the order from his profile page
- The user can buy products without been logged in or registered
- The user can see the checkout completed page after checkout successfully
- The user can see the order details and the delivery details on the checkout completed page
- The registered user can see the button to go to the profile page at the bottom of the checkout page
- The unregistered user can see the link to the homepage at the bottom of the page
